ARGHA KARMAKAR

SOFTWARE ENGINEERING STUDENT

EDUCATION

2025 - 2029
NIAT (NXTWAVE INSTITUTE OF ADVANCED TECHNOLOGIES)

- B.Tech in Software Engineering

2022 - 2024
MANINDRANAGAR HIGH SCHOOL

- Secondary & Higher Secondary (Class X & XII)

SKILLS

- Python, C++
- HTML, CSS, JavaScript, React
- Flask & REST APIs
- MongoDB & DBMS
- GEN AI & LLM Applications
- Data Structures & Algorithms
- AI Agents Development
- Problem Solving

LANGUAGES

- English
- Hindi
- Bengali

SUMMARY

Aspiring Software Engineer focused on building AI-powered and full-stack applications. Experienced in developing real-world projects using Python, LLMs, and modern web technologies, with a strong interest in scalable and intelligent systems.

PROJECTS

AI WEATHER INTELLIGENCE DASHBOARD

Tech: Python, Streamlit, Groq LLM, OpenWeather API

- Built an AI-powered weather dashboard with real-time data integration.
- Developed an LLM-based assistant for natural language queries.
- Visualized weather insights using charts and global map.
- Deployed on cloud for real-time access.

Live: AI Weather Dashboard | GitHub: View Code

AI-POWERED SEMANTIC SEARCH ENGINE

Tech: Python, FAISS, Sentence Transformers, Streamlit

- Built a semantic search engine using embeddings for accurate retrieval.
- Used FAISS for fast similarity search on large datasets.
- Enabled context-aware results with sentiment-based summaries.
- Deployed on cloud for real-time access.

Live: Semantic Search Engine | GitHub: View Code

ACHIVEMENTS

•• Built and deployed multiple AI-driven and full-stack applications using React, Python, and modern development tools with scalable architecture.

• Developed intelligent systems leveraging Generative AI, LLM workflows, prompt engineering, and AI agents for real-world automation tasks.

• Strengthened advanced problem-solving skills by applying Data Structures and Algorithms to design efficient and optimized software solutions.
